SUMMARY

Data Analyst with 2 years of experience building ETL/ELT pipelines, Snowflake-based data warehouses, dimensional data models, and BI dashboards. Strong in SQL, Python, and Power BI. Comfortable owning the full path from raw source data to stakeholder-ready reporting.

WORK EXPERIENCE

Analytics Engineer

Jan 2026 – Present

Appex Multisol Pvt Ltd

Lucknow, UP

- Built ETL/ELT pipelines in SQL and Python loading **15–25 source tables** into a Snowflake data warehouse for analytics-ready reporting.
- Designed dimensional data models (star schema) in Snowflake powering **5–8 Power BI dashboards**, improving how teams access core metrics.
- Ran scheduled and on-demand pipeline jobs processing **100K–500K records**, with validation checks and monitoring to catch quality issues before dashboards.

Data Analyst

Jan 2025 – Dec 2025

Appex Multisol Pvt Ltd

Lucknow, UP

- Processed datasets of **100K+ records**, structuring staging and warehouse tables and writing queries for reliable, repeatable reporting.
- Extracted and loaded data from multiple sources including AWS S3, transforming it into fact and dimension tables.
- Partnered with stakeholders to translate reporting requirements into the datasets and models that answer them.

Data Analyst

Jun 2024 – Dec 2024

Bravoji.com

Remote

- Built **10+ Power BI dashboards** (DAX) tracking KPIs, ROI, and campaigns the team relied on to guide decisions — contributing to a reported **15% revenue increase**.
- Analyzed sales data across **50+ TikTok e-commerce stores** to surface trends in revenue, product performance, and campaigns.
- Cleaned and transformed **50,000+ leads** using Power Query to make the data reliable enough for analysis.

Application Support Intern

Apr 2024 – May 2024

PeopleStrong

Gurugram

- Managed and validated HCM platform data for **500+ employees**, maintaining accuracy and system reliability.
- Resolved **200+ data-related issues** by tracing root causes and applying structured fixes.

PROJECTS

End-to-End Data Pipeline — Snowflake & Dimensional Modeling

- Built an end-to-end ELT pipeline ingesting raw data from multiple sources and loading **100K+ records** into a Snowflake data warehouse.
- Modeled data into a star schema (**1 fact + multiple dimension tables**) for scalable analytical querying.
- Used SQL and Python for cleaning, transformation, and aggregation, with a documented warehouse layer for repeatable reporting.

Business 360 — Analytics Dashboard Suite

- Transformed **2.2M+ records** from MySQL into a connected set of Power BI dashboards.
- Built **10+ dashboards** spanning finance, sales, marketing, and supply chain with DAX-based KPI tracking.

SKILLS

Core: SQL, Python, Power BI (DAX), Snowflake

Data Engineering: ETL/ELT pipelines, data modeling (star schema), data warehousing

Cloud & Databases: AWS S3, MySQL, PostgreSQL

Exposure (learning): Databricks, PySpark, Tableau

EDUCATION

B.Tech, Electronics & Communication Engineering

2019 – 2023

ABES Engineering College, Ghaziabad
